

Export the DataFrame of the last exercise to a csv file using '@' as a separator

```
In [1]: import pandas as pd

df = pd.DataFrame(index=['me', 'colleague'],
                  data={'size': [170, 190],
                        'birth date': ['03/09/2010', '04/01/2120']})
df['birth date'] = pd.to_datetime(df['birth date'], dayfirst=True)
df.to_csv('my_ex.csv', sep='@')
```
